Attention: Ms B Monroe

Dear Beverly

East German Patent Application No APB27M/341262.2
Your Ref: 1357 - Our File: 31356

Representation of this application has, as you know, been taken over by Patentanwalte Felke & Walter. They report that in the course of dealing with some formal matters, they have amended pages 1-3 of the specification as well as Claim 12.

Claim 12 has been amended so that the features of the outer wrapper are stated explicity, other than by reference to "any preceeding Claim". I enclose a copy of the new pages, in German, from which you will see that the definition of the outer wrapper is that of Claim 1, with alkaline metal salts such as succinate and citrate as the preferred burn chemicals. This seems to me to be in order.

I will keep you informed of the progress of this application.

Yours sincerely

N MARLOW
